		<u>See</u>	e Continuation Sheet			

Continuation of 9. Other (including any explanation in support of the above items): Applicants' are directed to M.P.E.P. 1206 "Appeal Brief section which indicates the following with respect to the 'Summary of Invention:

A concise explanation of the invention defined in the claims involved in the appeal. This explanation is required to refer to the specification by page and line number, and, if there is a drawing, to the drawing by reference characters. Where applicable, it is preferable to read the appealed claims on the specification and any drawing. While reference to page and line number of the specification may require somewhat more detail than simply summarizing the invention, it is considered important to enable the Board to more quickly determine where the claimed subject matter is described in the application.

The 'Summary of Invention' in the Appeal Brief, filed 28 July 2004, fails to provide a concise explanation of the invention defined in the claims involved in the appeal. First, no page and line number is indicated for support of paragraphs 1-5 (note only a portion of paragraph 3 is indicated). Second, with regards to referencing Figure 2 in paragraph 5, absent from the figure is any such language. Third, the page and line numbers cited for the support of paragraphs 6 and 7 fails to support the claimed steps "aligning the sizes of said fragments into corresponding ones of discrete size bins; determining a sequence of fragments according to values of said bins" of independent claim 14. Applicants are directed to the above M.P.E.P. section for enabling the Board to determine the claimed subject matter. Therefore, for the above reasons the 'Appeal Brief' filed 28 July 2004 is considered defective. Additionally, Applicants' are requested to correct the spelling and typographical error in claim 12 (lines 11 and 15), wherein "fore" should be replaced with "for" and "-." should be removed. Applicants are reminded of the revised 'Appeal Brief' rules (effective September 13, 2004) which would be applied for any subsequently filed 'Appeal Brief (refer to Federal Register Part II Volume 69, Number 155).
